Summary

Third-year Computer Science student at Banasthali Vidyapith with a genuine curiosity about how technology, design, and communication intersect. I build hybrid LLM and rule-based systems, lead content strategy for a 100+ member technical community, and founded a grassroots education initiative from the ground up. Comfortable moving between technical and creative work, and always asking how things could be better.

Experience

Content Head

07/2026 – Present

Microsoft Student Chapter, Banasthali Vidyapith (MSC-BV)

Rajasthan, India

- Own end-to-end content strategy and team operations for a 100+ member student developer community, translating technical concepts into clear, engaging material for a wide range of audiences.
- Author campaign copy, technical guides, and workshop collateral for campus-wide developer events, balancing accuracy with accessibility.
- Partner directly with chapter leads and external technical stakeholders to align messaging, timelines, and delivery – practicing the kind of cross-functional communication that keeps a product or program on track.

Executive Member

09/2025 – 07/2026

Microsoft Student Chapter, Banasthali Vidyapith (MSC-BV)

Jaipur, India

- Wrote tech-focused articles, announcements, and workshop collateral supporting official university technical sessions.
- Collaborated across creative and technical teams to grow community engagement and expand event reach.

Projects

EMEA Fund Strategy Classifier

2026

Github

- Built a hybrid LLM + rule-based pipeline classifying mutual funds into 21 investment strategies and 3 risk notches from prospectus text, using a cascaded, auditable architecture that keeps every decision traceable rather than a black box.
- Designed an imbalance-aware evaluation suite (macro, weighted, log-weighted, tercile metrics) reaching 99% / 96% / 96% accuracy across category, notch, and strategy layers.

DraftBox

2026

Github

- Designed and built a workflow tool for managing, organizing, and iterating on technical drafts and documentation – born from noticing a real gap in how writers version their own work.
- Designed clean, intuitive UI patterns and an iterative versioning structure aimed at making the writing process faster and less frustrating, with a strong focus on user experience.

Anbhigya – Founder

2021 – Present

Notion Documentation

- Founded an educational initiative supporting high-school students in under-resourced small towns, driven by curiosity about how access and opportunity could be designed more equitably.
- Curated career exposure sessions and architected a structured, public Notion hub to document and share learnings after every session – building a system, not just a one-time event.

Volunteering: *Youth Empowerment Foundation (YEF)* – Supported fundraising campaigns and on-ground logistics for grassroots educational access initiatives.

Education

Bachelor of Engineering in Computer Science and Engineering

07/2024 – 2028

Banasthali Vidyapith

CGPA: 8.17 / 10.00

Class XII (Senior Secondary)

2021 – 2023

Campion Public School

Percentage: 81%

Class X (Secondary)

2020 – 2021

Servite Convent School, Naramdapuram, India

Percentage: 93.2%

Skills

- **Languages & Tools:** Python, Pandas, scikit-learn, C++ (Intermediate), HTML, Cursor (Vibecoding), Prompt Engineering, LLM Orchestration
- **Design & Product Thinking:** UI/UX Design Patterns, Iterative Design, User-Focused Problem Solving
- **Documentation & Writing:** Technical Documentation, Technical Writing, Creative Writing, Public Notion Hubs
- **Leadership & Operations:** Content Strategy, Community Building, Cross-Functional Collaboration

Achievements

- **Vidyarthi Vigyan Manthan – National Exposure Delegate (MPCST):** Selected for a fully funded national scientific trip; ranked in the top tier out of 267,000+ national participants.
- **Inter-College Ideathon – 2nd Runner-Up, Top 3 of 100+ Teams (2025):** Conceptualized a smart roommate-matching platform featuring algorithmic preference filtering.
- **Smart India Hackathon (SIH) – Inter-University Qualifier :** Qualified for inter-university rounds for designing a gamified rural education solution.
